

COMMERCIAL AUTO RANGE BENEFITS

Each KiloWatt Master product has a number of benefits aimed at commercial applications.

- Microprocessor based intelligent auto switching control
- Real time adjustments to smooth peak loads
- Increased device life with capacitor auto switch-off
- Display of Power Factor, Power (KW), Volt & Current
- On site programmable all parameters with plug-n-play user friendly settings
- A modular system for easy installation, operation & maintenance

**AUTOMATICALLY
ADJUSTS TO EQUIPMENT
CHANGE AND ADDITIONS**

**REDUCE YOUR ENERGY
CONSUMPTION & SAVE**

**COST EFFECTIVE
AND CLEAN ENERGY
MANAGEMENT SYSTEMS**

STATE OF THE ART MAXIMIZED ENERGY USE

State of the art KiloWatt Master devices with real time current monitoring adjusting capacitance for optimal savings. These dynamic devices are the latest in technology setting a new level for energy efficiency for commercial, light industrial and small business applications.

Proper sizing for KiloWatt Master devices is critical for saving on power consumption. Unlike conventional devices, the XZERES KiloWatt Master Auto Range monitors voltage, current and power factor in real time adjusting the units ability to save on electric consumption from inductive loads.
